Snow Leopard

A quiet loner from the high mountains

More info

Where does it live?

High mountains of Central and South Asia

ITS HOME

It lives in rocky mountain regions of Central and South Asia.

ALONE OR IN A GROUP?

Adult snow leopards usually live alone. Females raise their cubs on their own.

WHAT DOES IT HUNT?

It is a carnivore. It mainly hunts mountain sheep and ibex, but also marmots and other small animals.

DID YOU KNOW?

Its wide, furry paws work like snowshoes and help it move through the snow.

FLUFFY TAIL

Its long tail helps it balance. In cold weather, it can wrap its tail around its body.
